

For immediate release

PRESS RELEASE

Brossard, May 23rd, 2017 – Mantra Pharma Inc. is proud to welcome the new addition, **M-K20 soluble**, to its family of potassium products! This product is indicated for the treatment or prevention of hypokalemia not resulting from a dietary deficiency.

M-K20 soluble differs from most other potassium products of the same strength by its **scored tablet** and **mechanism of action**; **M-K20 soluble** can be dissolved in water. Therefore, patients who have trouble in swallowing tablets may:

- Cut a tablet in half and take each one separately with a glass of water or,
- Prepare an aqueous solution (water) with one tablet in 250 ml of water until full dissolution.

M-K20 soluble is available at highly competitive prices compared to the original brand and is **covered** by Quebec’s Health Insurance Plan, **RAMQ**.

Commercial name	Form	Price	Original brand	McMahon	McKesson Pharmaplus	PJC	Familiprix
	100	19,95\$	K-DUR®	31324201	105408	757545	069699
	500	99,75\$		31324301	105335	757547	069701

Also available in the Mantra Pharma potassium family of products: **M-K8 L.A.**, **M-K10 L.A.**, **M-K20 L.A.**
